Google Cloud Platform

This hosting platform offers a variety of useful services for web and mobile applications: Firebase, Maps, and so on.

1. Follow steps 1 and 2 in this document. Make sure to sign in with your company Google account, not a personal gmail account.
2. Give the project a meaningful name.
3. Follow step 1 on this page to invite me to the new project you just created. Use my `{GCP Invite Email}` email address and please add me as an Owner.
